

SaniDate 5.0 Sanitizer/Disinfectant Now Available in Canada

BioSafe Systems' SaniDate 5.0 Sanitizer/Disinfectant is now approved for sale and use in Canada. SaniDate 5.0 is a hard surface sanitizer labeled for use on hard, non-porous surfaces, including food contact surfaces, to eliminate bacteria such as E. coli, Salmonella, and Staph.

This environmentally-responsible product leaves behind no harmful residues, and does not require a potable rinse. SaniDate 5.0 is an alternative to chlorine and other harsh chemicals, and OMRI Listed for organic use in the United States. Using a stabilized form of Hydrogen Peroxide and Peroxyacetic Acid, SaniDate 5.0 eliminates bacteria on contact, then breaks down into water and oxygen. SaniDate 5.0 is ideal for use in food processing facilities, grocery stores, restaurants, offices, and schools.

SaniDate 5.0 comes in 2.5, 5, 30, 55, and 275 gallon containers. For more information about SaniDate 5.0, contact BioSafe Systems at 1-888-273-3088.

About BioSafe Systems, LLC – The BioSecurity Company

BioSafe Systems, LLC is the manufacturer of disease control solutions such as ZeroTol Broad Spectrum Algaecide/Fungicide, OxiDate Broad Spectrum Bactericide/Fungicide and GreenClean Granular Algaecide. With a presence in the agriculture, animal health, post harvest, horticulture, turf, retail, and aquatics industries, BioSafe Systems will continue growing with the release of new products and solutions to meet the disease-control needs of homeowners and professionals alike.
